PRODUCT INFO

At Coaster, product safety, durability, and everyday functionality are at the core of our product development process. Across our bedroom and dining collections, each item is designed with thoughtful construction details, quality materials, and safety standards that support real-life use in the home.

Our exclusive bedroom and dining designs are developed with strength and reliability in mind. All bed sizes are tested to support up to 300 lbs. for twin beds and 600 lbs. for larger sizes.

Clothing storage units are designed to meet applicable ASTM F2057-23 anti-tip safety standards. Composite wood products are compliant with EPA TSCA Title VI formaldehyde emission standards.

Coaster also focuses on everyday performance through a variety of drawer constructions and glide systems that support smooth, reliable function. From felt-lined top drawers and dovetail construction to metal extension glides and other storage features, our case pieces are built to meet the needs of daily living.

Dining seating is also developed with comfort, support, and durability in mind. Our dining chairs are tested to support up to 300 lbs. per seat, reinforcing strength and reliability for everyday use. Select seating designs may include supportive construction details such as no-sag spring systems, quality cushioning, and performance fabrics that enhance comfort, durability, and cleanability.

From safe bedroom storage to dependable dining pieces, Coaster is committed to delivering furniture that balances design, function, quality, and customer confidence.
